

10,000
4 C.V. (760 C.C.) DE LUXE

(760 c.c.) DE LUXE

This model, with a soundproofed and heated body, has a number of accessories and fittings which ensure maximum comfort for the passengers.

A **Combination switch**, located on the steering column, controls all the lighting and signalling equipment (one lever with six consecutive positions: headlights full, headlights dipped, side and tail lights).

The horn is operated by pressing the end of the above-mentioned lever.

The direction indicators are also operated by a small switch on the steering wheel. Automatic self-cancelling action is provided by turning the wheel.

Speedometer which includes in one dial:

- Mileage recorder.
- Trip recorder.
- Red indicator light giving warning of low engine oil pressure and/or excessive water temperature.
- Green indicator light giving warning when dynamo is not charging.
- Petrol gauge.

Locks.

Three of the doors may be locked from the inside by means of a small lever. A key locks the left-hand front door. The same key locks the luggage boot. An interior catch in this boot acts as a safety lock.

Wide pockets in the trim of the front doors.

- Interior trim of the roof and doors in cloth, which ensures warmth and sound-proofing.
- Interior light (lights up automatically when door is opened, or can be operated by a separate switch).
- Two-spoke steering wheel.
- Thief-proof combined ignition and steering lock.
- Ashtray.
- Two sun visors.
- Bumpers with over-riders.
- Central tail light and number plate light.
- Unit on each wing comprising tail light, stop light and reflector.
- Aluminium guards on rear wings.

AIR CONDITIONING

In the summer fresh air is drawn in through a scuttle ventilator operated by a knob under the dashboard.

In the winter two scoops around the fan trap the hot air from the radiator and convey it through pipes to two vents let into the floor, near each front door.

In all weather, adjustable glass deflectors fitted to the front doors can be directed to give interior ventilation as desired.
